

Something opened. Nobody helped you *close it.*

A glimpse at 3 a.m. A week you still can't explain. Then Monday, and no one to walk you the rest of the way through. **There's a word for that: an initiation you entered and were never brought out of.**

WHAT THIS IS

APTITUDE is a 36-week container for finishing what opened — ten stages, one practice and one habit at a time. Adepthood is the app that paces it and holds the journal you write along the way.

- Integration, not transcendence — nothing gets bypassed or outgrown
- Starts at one to three minutes a day, stepping up every three weeks
- No guru. You get the blueprints; you choose the materials
