

Three good weeks. Then the floor. *Every time.*

It isn't random and it isn't your character. It's a wave with six phases, and it keeps its order. **Every phase has a medicine and an overdose — the trick is knowing which one you're taking.**

WHAT THIS IS

A private, encrypted journal built around the Archetypal Wavelength — a six-phase map of the cycle you are already living, so you can tell where you are on it and what that phase actually asks for.

- Rising · Peaking · Withdrawal · Diminishing · Bottoming out · Restoration
- The bottom has its own medicine, and it isn't "try harder"
- Your writing stays yours — encrypted, exportable, deletable
