

You have a whole community. You've never met *any of them.*

There is a Sangha here too — and its stated job is to give you back to the one where you actually live.

WHAT THIS IS

A private journal, a 36-week course, and a Discord — arranged so you can take one and leave the others. Every part of it is built to be outgrown.

- Nothing is gated. Nothing is mandatory. No streaks to keep
- Keep the journal, never open the course — that counts as using it right
- Nothing here punishes you for leaving and taking your writing with you
